

## Stem Cell Support Your Future is Now

Stem cells occur naturally in the body and serve to replenish cells that are lost through normal wear and tear or injury.\* As we age, our body's ability to self-repair and maintain optimum health decreases due to a reduction in the number of circulating stem cells associated with the normal aging process. Increasing the number of circulating stem cells is believed to support the body's process of self-repair and self-renewal.\*

StemEnhance® Ultra assists the body's inherent ability for long-term self-renewal by supporting the body's natural release of bone marrow stem cells.\*

## Live an extraordinary life with StemEnhance Ultra

- Supports the body's natural release of stem cells\*
- Supports healthy tissue renewal and maintenance\*
- Supports the body's natural ability to self-heal\*

## Pay It Forward

True happiness comes with balance and abundance in all areas of life. The Cerule® family believes the most honorable gift is to pay good fortune forward by sharing knowledge, practicing kindness, and providing endless support in this global journey called life.

## Five Pillars for an Extraordinary Life

-  Healthy Body
-  Healthy Mind
-  Healthy Finances
-  Healthy Relationships
-  Healthy Communities

# StemEnhance® ULTRA

 **cerule** | Building Extraordinary Lives™

Be Better than your best.  
Be Extraordinary.

## What is StemEnhance® Ultra?

StemEnhance Ultra concentrates and combines extracts from nature's most primitive superfoods, freshwater microalgae and marine macroalgae, providing the body with the ultimate in stem cell support.

StemEnhance Ultra is backed by years of identifying, refining, and extracting compounds using proprietary and patented technologies.

The blending of StemEnhance with Fucoidan offers a unique synergy that is further enhanced by Mesenkinine™ – a unique extract from Spirulina isolated through our patented extraction process. Mesenkinine supports the migration and homing of stem cells by balancing key messengers involved in stem cell function.

StemEnhance Ultra is the result of 16 years of research and constitutes the most efficacious and scientifically proven stem cell support product in the market today.

## Proven Clinical Studies

Through multiple clinical trials, StemEnhance® Ultra was documented to optimize stem cell function in the body by increasing the number of both stem cells and Endothelial Progenitor Cells (EPCs) in the blood circulation, supporting optimum renewal and repair of tissues and organs.

StemEnhance Ultra also contains Mesenkinine™ that was shown to increase the blood concentration of G-CSF that plays a key role in stem cell release.

## Synergistic Perfection

Cerule® formulates its products guided by the principle that good health is a sound balance between body, mind, and spirit. This synergy is essential for anyone to realize their full potential.

## Triple Synergy of our Signature products:

### StemEnhance ULTRA

StemEnhance Ultra supports the natural release of stem cells.\*

### PlasmaFlo

PlasmaFlo supports optimal blood flow and capillary health for unobstructed delivery of oxygen, nutrients and stem cells.\*

### Cyactiv

Cyactiv balances systemic inflammatory enzyme activity and supports the ability of stem cells to find and rejuvenate tissues in need of renewal.\*
